CUBIC MAG. HOLDER

Stainless Steel 316 & Nylon

- Magnets fully encapsulated in stainless steel 316 to withstand corrosive marine environment.
- Match any magnets as a set.
- If you pair a flush rubber bumper style magnet with a proud magnet, the proud side should be the same or larger size to prevent damages.
- Rubber bumper style magnets reduce noise, hence ideal for interior application. Plus, due to potential UV degradation, exterior use is not recommended.
- Screw size M4 or #8.

CHOOSE YOUR MAGNET

Instructions for selecting the correct part number

The cubic magnet holder is a powerful and reliable holding system designed to ensure a strong and durable catch between moving parts. To determine the correct part number, please follow the outlined steps:

1: DEFINE THE NEGATIVE MAGNET

a) Holding power: Choose the required holding power based on your application needs.

b) Style: Select either the flush or proud style.

c) Rubber bumper: Decide whether a rubber bumper is needed for additional cushioning or protection.

2: SELECT THE POSITIVE MAGNET

a) Size: Choose the appropriate size.

b) Style: Select the style that complements the chosen negative magnet.
