## MEGA FLOW EXHAUST THRU HULL

### Stainless Steel 316 & Stainless Steel 304 Nuts

- High density marine-grade stainless steel ensures strength and prevents crevice corrosion.
- Includes a durable stainless steel flapper to keep water from seeping into the exhaust system.
- A stainless steel drip collar prevents staining of hull.
- Machined inner finish reduces potential for residual debris.
- Integrated stainless steel 304 ground screw on nut.
- Included gasket eliminates the need for caulking.
